About Performance of a Lifetime

Performance of a Lifetime uses the art and science of performance "off the stage" to help leaders close the gap between the status quo and their desired future. Our global team of coaches leverage The Becoming Principle® to engage leaders and entire organizations in discovering, creating and acting on new and uncharted possibilities. When you practice performing the way actors and improvisers do, you are able to be both who you are and who you are not yet — that is, who you and your team or organization want to become. Our services include professional development workshops and custom leadership development programs. Performance of a Lifetime's work has been featured in the *Harvard Business Review*, the *Wall Street Journal*, *Fast Company*, *Forbes*, and *Wired*.
